

# #RISK

Expo Europe

Risk. It's everyone's business.

10th & 11th November 2026

Excel, London

#RISK Expo Europe is Europe's leading risk-focused expo, uniting the GRC, Risk, Security and RegTech community at scale.

Taking place at ExCeL, London on 10–11 November 2026

The #RISK Expo Europe audience consists of senior Risk, GRC, Security, Privacy, ESG and Supply-Chain decision-makers from across Europe, responsible for shaping integrated risk and resilience strategies for their organisations.

## The five content streams are:

### Information Security

Designed to connect security leaders, risk owners and vendors, this stream focuses on cyber risk, data protection, threat-led testing, and technology-driven security controls across the enterprise.

### BFSI (Banking, Financial Services & Insurance)

Where financial risk, compliance and innovation meet, covering prudential and conduct risk, operational resilience, AI in financial services, fincrime/AML, and the evolving regulatory landscape for banks, insurers and asset managers.

### Protective Security

Concentrates on the convergence of physical, personnel and cyber risks in practice, including critical-infrastructure protection, insider risk, security operations, and integrated security strategies for complex estates and public venues.

### TPRM and Supply Chain Security

Puts third-party risk management and supply chain resilience in focus, with sessions on vendor due diligence, continuous monitoring, contractual risk, geopolitical disruption, and digital supply-chain vulnerabilities.

### Governance, Risk & Compliance (GRC)

Built to connect GRC leaders, risk owners and solution providers, this stream covers enterprise risk frameworks, policy and control management, assurance, audits, regulatory change, ESG-linked risk, and turning compliance into strategic value.

Our UK database consists of over 500,000 highly segmented professionals, the beating heart of the risk ecosystem. It's concentrated in high-growth buying centres, core GRC (250k), AI, Information Security, Data Enablement & RegTech (170k) and Financial & Regulatory (100k+). We also have a deep and specific reach into the most heavily regulated, hardest-to-reach sectors, including BFSI (70k), Education (5k), Healthcare (20k) and Construction (13k).
